

# PAR 36 SPOT BANKS

Spot banks are available in various configurations for par 36 lamps. The Spot Banks are designed, with ease of use in mind. They feature robust lightweight aluminium construction, semi-gloss black electrostatic paint finish, and heavy duty yoke with positive lock off. The lock off is accomplished by using a tee bar to enable unit to be set at any desired angle. In addition to these features, each lamp bank will pan independently to alter the lighting angle. Lamp changing itself is simple due to quick release knobs on lamp the retaining ring. The retaining rings are chrome plated and are fitted with a safety mesh. This unit is available with an ETL listing when specified.

The spot banks can be supplied with stand off colour frame, with 2 or 4 way barn doors. Adapters are made for all the major brands of colour changers.

The units can be supplied wired or unwired. Custom sizes can be built to order.

T.V. spec includes the following, T.V. spud, bolt set, 4 way barn doors and internal partition.
